Welcome

Asia-Pacific Conference on Condensed Matter Physics 2022 November 21-23, 2022

It is our great pleasure to invite you to attend Asia-Pacific Condensed Matter Physics Conference 2022(AC2MP2022) which will be conorganized by the Division of Condensed Matter Physics(DCMP) and Institute for Materials Research, Tohoku University. The DCMP is aiming at systematic and continuous exchanges to further develop condensed matter physics in the Asia-Pacific region. Condensed matter physics is one of the major parts of physics that covers a wide range of disciplines. It is constantly developing with strong interactions with various scientific areas and contributes to the expansion of human knowledge and the developments of society. The Institute for Materials Research is one of the international centers of materials science and condensed matter physics and is operating the international collaboration program called GIMRT:Global Institute for Materials Research Tohoku. AC2MP2022 is the international conference to summarize the current status and future prospects in condensed matter physics and in related communities. It also includes the second annual meeting of the DCMP where the summary of the activities will be reported for the expansion of the international collaborations. The format of the conference will be hybrid and in-person attendance to the venue at Senai, Japan is strongly encouraged. Online participation is also possible by considering the difficulties for overseas travels.

The Chairperson

Prof. Hiroyuki Nojiri

Institute for Materials Research, Tohoku University

The Co-chairperson

Prof. Je-Geun Park

Seoul National University

Division of Condensed Matter Physics
of AAPPS 第2回総会も実施

2021-2022

Chair J. G. Park

Vice Chair S. Yusuf, H. Nojiri

2023-2024

Chair H. Nojiri

Vice Chair H. H. Wen, K. W. Choi
